

Output Stored Procedures

1.

The screenshot shows the MySQL Workbench interface. The 'Query' tab is active, displaying SQL code to create a table and insert data. The 'Schemas' pane on the left shows the 'bank' database selected. The 'Result Grid' shows the 'accounts' table with columns 'account_id', 'customer_id', and 'balance'. The 'Output' pane shows the execution log, including errors for creating a stored procedure that already exists.
